

How can your school:

Reduce janitorial supply costs?

Free staff from time-consuming tasks?

Improve sustainability compliance?

DAYCON
Cleaning & Maintenance Supplies

Reduce janitorial supply costs by 5% to 15%

1

The Vendor Managed Inventory process begins with a survey of facilities, your maintenance requirements, ordering processes and inventory controls. Based on our assessment results, we'll develop a Vendor Managed Inventory Program that:

- Ensures that your team has the supplies and equipment they need to operate at maximum efficiency
- Reduces excess inventory and carrying costs
- Enables your school to put costly warehouse space to more productive use
- Reduces total spending on cleaning and maintenance supplies by 5% to 15%
- Eliminates chaos from supply areas to ensure efficient organization, safety, easy access and never out-of-stock inventory controls

Free staff from time-consuming manual tasks

2

Labor represents 93 percent of the average school's cleaning and maintenance budget. How much time does your staff spend finding, ordering and managing maintenance supplies and equipment? Your Vendor Management Inventory program will:

- Free your staff from the time-consuming, manually-intensive processes of ordering, receiving, transporting and stocking maintenance supplies and equipment
- Enable your staff to spend more time ensuring that your facilities meet the highest standards for cleaning and maintenance
- Help your department operate at maximum efficiency to be competitive with commercial building services contractors

Improve sustainability compliance and reporting

3

Daycon's experts examine each facet of your operations from cleaning chemicals and processes to equipment and training in order to meet your school's sustainability mandate. Your Vendor Managed Inventory Program provides you with the reporting and inventory controls you need to:

- Ensure complete inventory of certified and compliant products
- Maintain always up-to-date usage reporting for budget management and LEED credit and compliance

Learn how you can start putting the advantages of Daycon's Vendor Managed Inventory to work for your school.
