HAZARDOUS COMBUSTION PRODUCTS:

Oxygen released on exothermic decomposition may support combustion in case of surrounding fire.
Pressure burst may occur due to decomposition in confined spaces/containers.
Wet product decomposes exothermically and may cause combustion of organic materials

EXTINGUISHING MEDIA:

Use extinguishing method for the surrounding fire. Avoid water if possible, moisture will cause a release of oxygen, which will help fuel the fire.

FIREFIGHTING INSTRUCTIONS:

Wear appropriate and suitable protective clothing and breathing equipment for the situation. Follow NFPA Fire Protection Guidelines. When intervention in close proximity, wear acid resistant over suit.

6. ACCIDENTAL RELEASE MEASURES

SMALL SPILL:

Collect free material. Dust respirators may be required.

LARGE SPILL:

If possible, clean up spill area on a dry basis and then flush with plenty of water. Absorb liquid with vermiculite, floor absorbent or other absorbent material. Keep out of sewer, streams, ponds, lakes, or other waterways.
