TRIAD

Encapsulating Carpet Cleaner

Description:

Triad is a state of the art formula for use in carpet extraction, shampooing, bonnet cleaning, and spotting. It may be used in all extraction equipment and on all types of carpet. Triad is highly effective on oily types of soil as well as most other common soils and stains. This unique blend of detergents is safe on stain resistant carpets because of its low alkalinity and it is easy to work with because there is no need to add defoamers, brighteners, or odor counteractants. Triad contains an encapsulating polymer that traps soils so they may easily be vacuumed up without resoiling the carpet. It enhances the soil resistance of the carpet, allowing the carpet to stay clean longer. Triad is approved for use by the Carpet and Rug Institute (CRI). Triad is packaged in recyclable containers.

Benefits:

- High-efficiency deep-cleaning formula
- Low foaming
- Built-in odor counteractants
- Contains an encapsulating agent
- Enhances the soil resistance of the carpet
- Safe for stain resistant carpets (low alkalinity)
- Biodegradable, phosphate free
- Will not cause carpet brown-out
- No VOC's
- Carpet and Rug Institute Approved

Specifications:

Appearance	Clear Liquid
Color:	Pink
Odor:	Morning Mist
Use Dilution:	1:10.6 – Carpet Extraction, Bonnet Cleaning, Spotting
Storage Stability:	Two years minimum in sealed container
Protective Clothing:	See Safety Data Sheet (SDS)
VOC's, % as is:	0
Product Conformance:	Manufactured by an ISO 9001:2008 registered company.

Comments:

This product is recommended to be used with cold water from the tap. Always, test the cleanability of cotton and oriental carpeting before you use any detergent extraction system.

Directions:

This product is recommended to be used with cold water from the tap at an 10:1 dilution ratio or 12 oz. per gallon of water. Use for carpet extraction, bonnet cleaning, and general purpose spotting.

Product Disposal:

This product is non-hazardous material. Dispose of in accordance with local, state, and federal regulations. It is recommended that the high density polyethylene container and any corrugated packaging be recycled.

Packed:
